"Figma UI/UX Design: Web and App Design with Projects _ (2024)".

Aditi Kashetwar

UI UX developer | frontend developer | Oracle
Nanded, Maharashtra, India

Summary

As a UI/UX designer, I'm on a mission to turn confusing websites into intuitive experiences—because, let's be honest, we've all been there, clicking around trying to figure out what's going on. Skilled in Figma and well-versed in user-centered design principles, I approach each project with a mix of creativity, adaptability, and just the right amount of caffeine.

I thrive in collaborative environments and believe that great design comes from teamwork and shared ideas. I'm always on the lookout for new trends in design to keep my skills sharp—and maybe add a bit of humor along the way, because after all, user experience shouldn't be boring!

Let's connect and create designs that not only work but also make users smile!

Shubham Ingale

Java Full Stack Developer | Java | Spring Boot | Microservices | MySQL | CI/CD Pipelines | Kafka | Angular | OCJA Certified | System Engineer @tcs

Pune District, Maharashtra, India

Summary

Java Full Stack Developer with 3 years of experience in building scalable enterprise-grade applications, primarily in the banking and financial services domain.

Core Technical Strengths:

Strong hands-on experience in Java 8, Spring Boot, Spring Security, and RESTful API development.

Expertise in designing Microservices Architecture with secure, modular, and scalable code.

Proficient in Hibernate/JPA for ORM, and MySQL/SQL for database design and query optimization.

Experience in frontend development using Angular and integration with backend services via HttpClient and RxJS Observables.

Skilled in CI/CD automation using Jenkins, with source control using Git/Bitbucket.

Familiar with containerized deployment using Kubernetes (Redshift OSE) and Docker.

DevOps & Monitoring:

Experienced in production support, log analysis, and issue resolution using Splunk.

Knowledge of SonarQube for static code analysis and quality gating.

API Gateway & Integration:

Worked on API Gateway migration from APIM to APIGEE, including policy creation, traffic routing, and security enforcement.

Agile & Collaboration:

Excellent understanding of Agile methodologies (Scrum), sprint-based delivery, and cross-functional team collaboration.

Comfortable participating in daily standups, sprint reviews, and defect triages.

Certifications:

Oracle Certified Associate, Java SE 8 Programmer – Validating strong foundational knowledge in Java programming.

Career Objective:

Passionate about solving real-world problems with clean and efficient code.

Looking for a challenging Java Full Stack / Backend Developer role in a product-based or fast-growing service company that values innovation, performance, and clean architecture.

March 2026 - Present (2 months)

Pune

_VOIS

Back End Developer

February 2024 - February 2026 (2 years 1 month)

Pune, Maharashtra, India

VOIS (Dynamo Desktop) | Assistant Lead responsible for supporting a Data Pipeline Management Tool. My duties include providing application support, helping with backend development, and resolving client issues promptly. I have experience with third-party integrations, including CDAP and GCP DataFusion.

iauro Systems Pvt. Ltd.

Software Engineer

May 2022 - September 2023 (1 year 5 months)

Pune, Maharashtra, India

Rakuten (Client) | Developed and implemented a comprehensive quiz module for an E-Learning platform, encompassing database design and end-to-end functionality including score management. Further contributed to the platform's community module by building features such as like functionality, connection requests, and a robust group management system (add, invite, remove, join requests). Successfully participated in the migration of the quizzes and community module databases from MongoDB to MySQL, ensuring data integrity and application stability.

Pawzeeble

Software Engineer

July 2021 - May 2022 (11 months)

Pune, Maharashtra, India

Pawzeeble Vet | Contributed to the development of an online pet booking platform. Key responsibilities included building the billing module for generating invoices for medicines and consultation services and developing an inventory management module for tracking medicine stock. Spearheaded the Proof of Concept (PoC) and successfully implemented a chat interface, which was subsequently integrated into the main application.

NGO | Developed an event management platform from the ground up. This involved integrating an SMS API for communication, creating end-to-end functionality for event creation, sending invitations, enabling location-based event discovery, and allowing users to join events. Implemented robust authentication and authorization mechanisms to secure the application.

iodParts Technologies

Full Stack Programmer

October 2019 - May 2021 (1 year 8 months)

Pune

iodParts (E-Commerce) | Responsible for the comprehensive management of the website's backend. Contributed to the project using both PHP and Node.js. Led the migration of the codebase from PHP to Node.js and facilitated the database transition from MySQL to MongoDB. Additionally, developed and maintained web scraping scripts to extract data from external sources.

Technologies Used: PHP, Node.js, MongoDB, MySQL, Web Scraping.

Pune Division, Maharashtra, India

Summary

Passionate and reliable IT professional with 3.9 years of hands-on experience in SAP MM. Possesses expertise in Procurement processes, Inventory Management and Logistics. Certified in SAP S/4 HANA Sourcing and Procurement

*SAP MM Expertise:-

Enterprise structure: Creation of Plant, Storage location, Purchasing Org, Purchasing Groups

- Master Data: Material Master, Vendor Master Purchasing Info Records, Source List, Quota Arrangement

- Customization: Material Type, Vendor Account Group, Number Ranges

Procurement: PO, PR, RFQs, Schedule Agreement Contracts, Goods Receipt (P2P)

- Release Strategy: Purchase Order and Purchase Requisition.

Automatic Account Determination: Valuation class movement type and MM-related OBYC settings

Special Procurement Process: Subcontracting Consignment process, STO.

Inventory Management: Good issue, Transfer posting and good receipt

- Split Valuation

*Job Profile:

Provided support for SAP MMLE issues in a US-based support project, handling tickets using ServiceNow.

Ensured timely resolution of error tickets within

SLA guidelines, including incident management implementation, and troubleshooting
Resolving the Procure to Pay (P2P) cycle incidents, Story and Change Requests
Experienced in handling IDOC monitoring. troubleshooting, and resolution of errors to maintain data integrity.
Resolving mapping issues between SAP system and Partner system, reprocessing IDOCs.
Managed and resolved integration issues between SAP and Coupa, ensuring uninterrupted operations
Worked on procure-to-pay (P2P) processes including NBPO and STO processes, MIGO, and MIRO.
Engaged in requirement gathering through business user calls for enhancement projects
Conducted unit testing, and created detailed testing documentation, Assisted the QA team in regression testing and change management using Solman charms and transport requests

Experience

Tata Consultancy Services
Sap Materials Management Consultant
March 2022 - Present (4 years 2 months)
Pune, Maharashtra, India

Worked as an SAP MM Consultant with hands-on experience in Procure-to-Pay (P2P), Inventory Management, Material Master, Vendor Master, and Invoice Verification processes.

Involved in gathering business requirements, preparing AS-IS/TO-BE documentation, and configuring MM components such as Purchase Requisitions, Purchase Orders, Release Strategies, Pricing Procedure, and Goods Movements.

Supported day-to-day business operations by resolving issues related to GR/IR clearing, posting period errors, account determination, source determination, and material/stock discrepancies.

Worked on creation of functional specifications for custom reports, enhancements, and interfaces; closely coordinated with ABAP, FI, SD, and PP teams to ensure smooth integration.

Performed UAT, Integration Testing, and Regression Testing along with end-user training and documentation.

Managed master data, batch management, stock transport orders (STO), subcontracting, and third-party procurement.

Participated in cutover activities, data migration validation, and provided post-go-live support for production issues.

Identified process gaps and recommended improvements to enhance procurement efficiency and reduce manual efforts.

Worked extensively on SAP ECC/S4HANA environments and followed ITIL-based ticketing processes (Incident, Problem, Change Management).

Vaibhav Yeotikar

System Engineer @ TCS | Ex-Cybagian | Java | Spring Boot | MySQL | Microservices | Git | JPA | Hibernate
Pune District, Maharashtra, India

Summary

I have over 2 years of experience in software development, primarily focused on developing applications using technologies like Java, Spring Boot, and MySQL. Building on a solid foundation in Computer Science, I hold a Bachelor of Engineering from Mahatma Gandhi Mission's College and a Postgraduate Diploma in Advanced Computing from SunBeam Institute of Information Technology. My education has provided me with a strong grasp of software development principles, particularly in Java development and Microservices.

Key skills and technologies:

Languages & Technologies: Java, Spring Boot, MySQL, PL/SQL

Frameworks: Spring Boot, Hibernate

Developer Tools: Git, Docker, Jenkins

Platforms: Eclipse, Visual Studio Code, IntelliJ, STS

Key Competencies: JPA, Microservices, REST APIs

In the future, I aim to deepen my knowledge in emerging technologies such as cloud computing. I am excited about contributing to projects that drive innovation and solve practical challenges, while continuing to grow as a software developer with a focus on delivering impactful solutions.

Experience

Cybage Software

Software Engineer

June 2022 - August 2024 (2 years 3 months)

- Leveraging my experience in developing Java and Spring Boot applications for the creation of efficient and robust software solutions.
- Developed a robust airplane reservation system leveraging Microservices architecture and REST APIs to ensure communication between distributed services. Successfully implemented key features such as booking, scheduling, and user management, significantly enhancing data management and overall user experience.
- Developed Microservices to retrieve services by name, filter them by type, and fetch details by ID, enhancing UI search functionality, which improved search efficiency.
- Leveraged microservices architecture to enhance application scalability and maintainability, resulting in improved performance and management of distributed services.
- Managed and designed SQL queries to meet specific data requirements and enhance business logic.

Bhakti Patil

Junior Data Scientist | Skilled in Machine Learning , NLP, Deep Learning & AI | Data Analysis and preprocessing, Data visualization | Python, SQL, AWS | Actively Seeking Data Roles

Pune District, Maharashtra, India

Summary

With 3+ years of experience in the BFSI domain, I specialize in developing and evaluating machine learning models to drive data-driven decisions. My expertise spans Python, NLP, LLMs and deep learning, along with a strong foundation in feature engineering, data preprocessing, and model evaluation. I am proficient in Python, AWS, SQL.

Key Skills:

Programming & AI: Python, NLP, LLMs

Machine Learning: Decision Trees, Random Forest, SVM, XGBoost, LightGBM, Regression, Classification, clustering.

Data Science & Analytics: Feature Engineering, Data Preprocessing, Model Evaluation, EDA

Tools & Platforms: AWS, Git

Soft Skills: Problem-Solving, Communication, Collaboration

Previously, as a System Engineer, I developed Tableau dashboards, automated alert mechanisms, and identified trends to enhance system performance and operational efficiency.

I have recently completed a Data science and Machine learning course from ExcelR Solutions and acquired certification from it.

Neha Bais

ETL Developer || AWS Experienced || Data Integration || Data Analyst || Python Developer

Reading, England, United Kingdom

Summary

- Currently, acting as a Python Developer with experience in data ingestion on the cloud using AWS services. Being involved in development of automation scripts that migrates the data from on-premise to AWS cloud.

- Having 4+ years of experience, I have garnered experience in variety of tool and technologies to delivery robust and transformed data to client and required stake holder. I help my colleagues and seniors to deliver complex logic via presenting bold and reasonable ideas.

- Informatica development, creation of the ETL pipelines using Informatica power center to transform the data from different sources like XML, flat file, CSV and relational table to target as per the requirement.

- Along with it additional functionality to pipelines is been added with the help for SQL queries and shell scripting.

- Beside work I like reading, writing small interesting quotes, working on artistic stuffs such as Resin art, Mandala art. I look forward to weekends as I cook new dishes watching food & travel shows.

Experience

Tata Consultancy Services

6 years 9 months

Integration Lead

September 2024 - Present (1 year 8 months)

London, England, United Kingdom

Project objective was to upgrade and migrated head office system from private cloud to Azure cloud for BP retail sites in ZA. As part of project all

integration between site BOS and HOS needs to be updated to ensure seamless transition and minimize impact on business analytics, operational and reporting system integrations.

Responsibilities:

- Acted as a primary point of contact for stakeholders, ensuring alignment between business objectives and integration processes.
- Contributed to build a roadmap by aligning integration timelines with broader project goals.
- Facilitated seamless communication between testing and deployment teams.
- Manage the impact of integration changes on other components and ensuring minimal disruptions and how integration impacts other areas.
- Pre-planning of the cutover activities and dry run on multiple sites.
- Anticipate risks related to integrations and propose mitigation strategies.
- Provide detailed updates to stakeholders on integration progress, risks and milestones
- Conduct reviews to evaluate the effectiveness of the integration and identify areas of improvements and planning hyper care activities and roll back plans.
- Planning of actual cutover after dry run based on the lesson learnt and checking on with teams on the impact of change during and post the cutover activity
- Participated in hyper care process and communicated between multiple parties to resolve the issues occurred during cutover.

Senior ETL Developer

September 2023 - August 2024 (1 year)

Pune, Maharashtra, India

- Requirements analysis and data examination for data migration strategies
- Development of Python-based data ingestion pipeline for on-premises to AWS data transfer
- Creation and testing of Python scripts for automated pre and post-session tasks
- Automation of manual tasks in daily development and testing activities
- Unit testing and performance testing to ensure code quality
- Configuring connections and managing data ingestion into AWS S3 buckets via AWS console
- Implementation of Python scripts in PyCharm for automation
- Script performance improvement and enhancement
- Establishment of a Data Quality framework for validating data migration checks

Senior Test Engineer

October 2022 - August 2023 (11 months)

Mumbai, Maharashtra, India

A full time test lead with experience in automated testing (which includes creation of automated test pipelines in Azure Dev Ops) using Playwright framework. I have also taken care of automated performance testing for dashboards, database tables/artifacts in the project.

My key focus was to improve delivery of performance test results, end-end project testing deliverables which includes formalizing the test strategies to ensure seamless delivery. Stakeholder management to align with the user expectation and formalize the UAT sessions for the formal sign off to the production environment, and managing a team and ensuring quality deliverables.

ETL Developer

August 2019 - September 2022 (3 years 2 months)

Mumbai, Maharashtra, India

Post my Master's Degree, I have joined TCS at Mumbai location and learnt ETL tool and technology to deliver transformed data for further analysis to stake holder. I have been part core development team and help to deliver ETL pipelines and manage them.

- Handled various technical aspects such as design, development, testing and documentation.
- Implemented Slowly Changing Dimension Phenomenon Type-1, Type-2 using Informatica ETL mapping.
- Imported data using source analyser and exported data using Target analyser designed and developed Oracle PL/SQL procedures.
- Designed Workflows that uses multiple sessions and command line objects (which are used to run the UNIX scripts).
- Developed UNIX shell scripts to format the session log files and to extract the information from error logs.
- Developed Unix shell script and SQL codes to perform basic pre and post session jobs.
- Automation activity for certain manual tasks involved in the daily development and test activity.
- Supervising daily operations in test and production environment.
- Migration of Informatica jobs across various environments.
- Perform unit testing, performance testing, regression testing to ensure the code is defect free.

-Created HLD's and LLD's document, sprint review document to showcase the sprint work to customers.

Pune Division, Maharashtra, India

Summary

As a Salesforce Developer with 6+ years of experience, I possess a strong understanding of the Salesforce platform and its various technologies. I am adept at developing customized solutions to meet business requirements, optimizing code performance, and integrating third-party applications.

With my expertise in Apex programming language, I have successfully developed and deployed complex workflows, triggers, and batch processes to automate business processes.

As a certified Salesforce Admin, I have extensive experience in managing users, data, security, and customization within the platform. My App Builder certification showcases my ability to design, build, and deploy custom applications that meet specific business needs. Additionally, my PD1 certification validates my knowledge of best practices and coding standards in Salesforce development which demonstrates my proficiency in writing clean, efficient code that adheres to best practices and maintains a high level of code coverage.

In addition to my technical skills, I am committed to staying up-to-date with the latest trends and best practices in the Salesforce ecosystem. With a strong focus on collaboration and communication, I am adept at working closely with stakeholders to understand their needs and develop solutions that align with their goals.

Overall, my skills and certifications make me a valuable asset to any organization seeking a Salesforce Apex Developer with a proven track record of delivering high-quality solutions.

System Engineer
November 2021 - Present (4 years 6 months)
Perimeter Associate (December 2021 – September 2024)
· Configured, decommissioned, and upgraded Cisco ASA firewalls to ensure robust perimeter security.
· Performed hands-on Zscaler troubleshooting for issues such as SSL certificate errors, blocked websites, application failures, ZCC not connecting, and slow browsing.
· Decommissioned legacy servers while maintaining operational stability.
· Configured and monitored network devices in SolarWinds, enabling proactive issue detection and alert handling.

Connectivity Engineer (October 2024 – April 2025)
· Managed SSL certificate renewals on F5 BIG-IP load balancers for uninterrupted secure communication.
· Achieved a significant reduction in SLA violations through effective queue handling and incident resolution in ServiceNow.
· Hands-on with Cisco Meraki: Configured switches and access points, set up VLANs, performed OS upgrades, and conducted basic troubleshooting via Meraki dashboard.

Transition and Transformation Associate / Offshore NOC Lead (May 2025 - Present)
· Contributed to a major on-prem to SD-WAN migration, actively working with Cisco Meraki, Cisco ISE, and Cisco Catalyst Center.
· Led the offshore NOC team, handling 24/7 network monitoring and escalation for global clients.
· Helped establish NOC team processes and onboarding strategies.

- Conducted comprehensive Knowledge Transfer (KT) sessions and authored process documentation to accelerate new joiner ramp-up and team readiness.
- Collaborated with infrastructure and security teams to streamline handovers and support model transitions.

SpringBoot

Microservices

SQL

Shubham Ingale

Java Full Stack Developer | Java | Spring Boot | Microservices | MySQL | CI/CD Pipelines | Kafka | Angular | OCJA Certified | System Engineer @tcs

Pune District, Maharashtra, India

Summary

Java Full Stack Developer with 3 years of experience in building scalable enterprise-grade applications, primarily in the banking and financial services domain.

Core Technical Strengths:

Strong hands-on experience in Java 8, Spring Boot, Spring Security, and RESTful API development.

Expertise in designing Microservices Architecture with secure, modular, and scalable code.

Proficient in Hibernate/JPA for ORM, and MySQL/SQL for database design and query optimization.

Experience in frontend development using Angular and integration with backend services via HttpClient and RxJS Observables.

Skilled in CI/CD automation using Jenkins, with source control using Git/Bitbucket.

Familiar with containerized deployment using Kubernetes (Redshift OSE) and Docker.

DevOps & Monitoring:

Experienced in production support, log analysis, and issue resolution using Splunk.

Knowledge of SonarQube for static code analysis and quality gating.

API Gateway & Integration:

Worked on API Gateway migration from APIM to APIGEE, including policy creation, traffic routing, and security enforcement.

Agile & Collaboration:

Excellent understanding of Agile methodologies (Scrum), sprint-based delivery, and cross-functional team collaboration.

Comfortable participating in daily standups, sprint reviews, and defect triages.

Certifications:

Oracle Certified Associate, Java SE 8 Programmer – Validating strong foundational knowledge in Java programming.

Career Objective:

Passionate about solving real-world problems with clean and efficient code.

Looking for a challenging Java Full Stack / Backend Developer role in a product-based or fast-growing service company that values innovation, performance, and clean architecture.
